

Ways to Save When you are Away

Are you ready for vacation? We have five tips to help ensure your home is prepared that will put your mind at ease while you're away.

Practicing these tips can help you save on your bill – learn even more ways to save [here](#).

Turn off the circuit breaker to the hot water heater. No need to heat water if you won't be home.

2

Set your A/C to 82 degrees before you head out for vacation. Every degree you raise your thermostat can save 5% on your monthly cooling costs.*

1

If you have a pool, set your pool pump to run no more than six hours a day.

3

Unplug appliances and electronics throughout your home or use timers to limit run times.

4

Close your blinds or curtains to help keep the heat out.
