Bright ways to save on Business Lighting

Get a rebate, lower bills and better quality with upgraded lighting

Lighting can account for 25 percent or more of a business's energy use, so we know it pays to upgrade to energy-saving fixtures. There are more options than ever before for energy-efficient lighting that works for your business. Also, you may qualify for our rebate and for federal tax credits towards your lighting upgrade.

Business Lighting

Continually improving technology and higher efficiency codes and standards have led to more energy saving lighting options than ever before. To help you select the energy-efficient lighting system that best fits your needs, we're available to help.
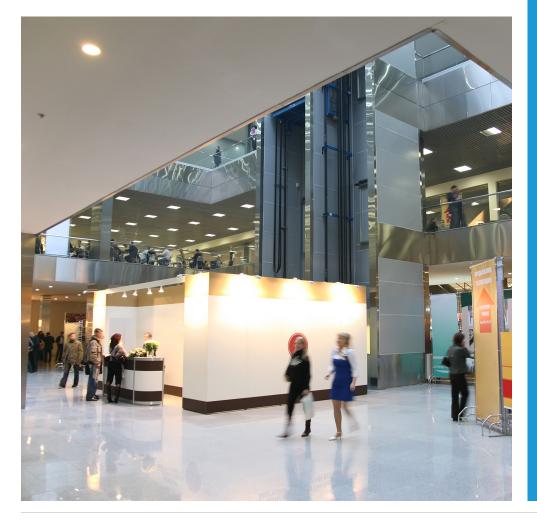

Benefits

Newer lighting technologies offer:

» Longer life that saves on replacement and maintenance costs

» Better quality light directed where and when you need it

» Reduce energy costs

» Reduces building cooling loads

» May help you qualify for a federal tax credit

Qualifying lighting systems

» High, Mid and Low Bay LEDs

$ Lighting rebates

How to earn rebates

Select an energy-efficient lighting system, and FPL will give you a rebate up to **$20** per fixture.

Eligibility

» All businesses are eligible to participate

» Lighting system must be pre-approved by FPL before installation

Minimum usage requirements

Rebates are for interior lighting that is used on a regular basis:

» From 3 to 6 p.m.

» Every day of the work week

» From June 1 to Sept. 30
