

Program Overview

ENERGY ENDGAME

Brought to you by
Florida Power & Light Company

Energy Endgame is performed by two professional actors who lead your students through an action-packed hi-tech adventure, all while teaching about energy conservation and resources.

In this 25-minute play, GameCo's top designer whiz, Hieronymus Tru (Hiero for short!), has created a cool new video game that's supposed to come out today ... but there's one small glitch. The company computers aren't working and all the lights are off – but nobody can figure out why! The irksome Internet Troll may be to blame. Can your students help Hiero venture into the grid and resolve the technical difficulties?

Along with the in-school assembly, digital materials are provided to expand upon the educational content of the program.

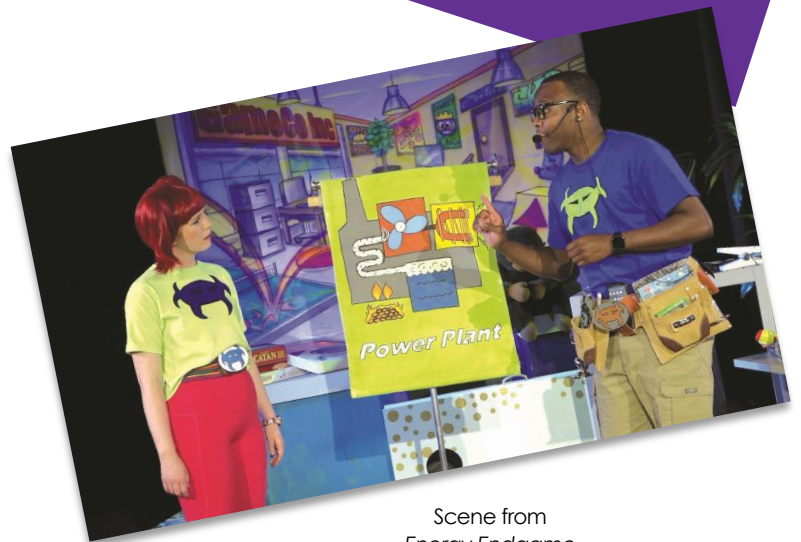

E-learning package

Ready, Set, PLAY!
Prepare to power up with the ultimate interactive science program ...

Educational Concepts

- How we measure energy
- How energy is wasted
- How we conserve energy
- What renewable resources are
- For more information about energy, FPL has created a comprehensive energy curriculum designed for this age group. Visit <https://www.energycurriculum.com/> for more information.
