FPL Business Programs & Services

Learn about energy-saving programs, rebates and other services available to you.

Saving money is always important no matter how big or small your company. We want to make sure that we're meeting everyone's needs, so we've designed energy-saving programs and services for businesses of all sizes. Many programs offer rebates to offset the cost of equipment upgrades, and most improvements pay for themselves over time in lower electric bills. FPL also offers other value-added services that can help you manage your business.

Rebates & Incentives

HVAC - Chillers

Comfort is more than a temperature setting. For your business, it means keeping energy costs down while maintaining a comfortable temperature for employees, customers and equipment. With FPL's Chiller Program, you can do both.

[Learn More](#)

HVAC - Energy Recovery Ventilation (ERV)

An energy recovery ventilation system helps cut HVAC energy costs by working with your air-conditioning system to prevent energy waste as fresh air enters your building.

[Learn More](#)

HVAC - Demand Control Ventilation (DCV)

Demand control ventilation (DCV) can save your business as much as 20 percent per year on HVAC energy costs while improving air quality inside your facility.

[Learn More](#)

HVAC - Direct Expansion (DX)

FPL's Direct-Expansion (DX) Air Conditioning program rewards your commitment to trimming cooling costs through rebates on installation costs.

[Learn More](#)

HVAC - Kitchen Demand Control Ventilation (KDCV)

A kitchen demand controlled ventilation (DCV) system minimizes the energy required to safely ventilate your kitchen, while maximizing the ability of the hood to contain heat and smoke.

[Learn More](#)

HVAC - Thermal Energy Storage (TES)

Installing a Thermal Energy Storage (TES) system is one way in which you can reduce your energy bill while keeping your facility cool and comfortable for employees and customers.

[Learn More](#)

Business Custom Incentive

FPL offers customized incentives to businesses or other organizations who upgrade their equipment or operations in ways that save significant amounts of energy.

[Learn More](#)

Commercial/Industrial Indoor Lighting

Interior lighting accounts for more than 25 percent of a business's energy consumption. Replacing your current lighting systems with energy efficient fixtures can result in significant savings, including rebates.
