

FPL has a storm plan, do you?

At FPL, we prepare year-round for hurricane season, so we're ready to respond when you need us most. FPL's investments to build a stronger, smarter, and more storm-resilient energy grid enable us to restore power faster.

- » For example, hardening efforts such as stronger power poles and more neighborhood power lines underground will lead to less damage to our system.
- » The tens of thousands of intelligent devices installed across the energy grid will allow us to prevent outages and restore power without dispatching crews.
- » And, after a storm clears, our drone pilots can quickly put eyes on the damage, so we get the right crews and equipment to the right place.

Hurricanes and tropical storms are powerful forces of nature that will cause power outages. While we are more prepared than ever for hurricane season, no energy grid is stormproof. Make sure you have a plan for you and your business.

Stay safe, stay away: power line safety

Safety is a cornerstone of our commitment to customers and employees. We urge you to stay safe and far away from power lines. You can be seriously injured or worse if you or an object you hold contacts a power line. Even nonmetallic ladders and equipment can conduct electricity. Be sure ladders, mechanical lifts or scaffolds are far enough away so you — and any tools you are using — don't come within 10 feet of neighborhood power lines or 30 feet of all other power lines. For more information, visit: [» FPL.com/Reliability](https://www.fpl.com/reliability)

FPL's Care to Share® program is here to help

The FPL Care To Share® program is made possible by the generosity of FPL employees, shareholders and caring customers just like you. The program helps individuals and families who are experiencing temporary financial difficulties keep their lights on when they need it most, including electric repairs to hurricane-damaged meter cans and weather heads. Be on the lookout for scams

Scammers use tactics to establish relationships with businesses and suppliers to receive goods or services. Don't be a victim. Send us an email at reportbusinessfraud@nee.com to confirm the legitimacy of the request. Learn more about the scams impacting businesses at: [»FPL.com/Protect](https://www.fpl.com/protect)

Where does your energy come from?

FPL's power comes from a variety of sources, including clean, U.S.-produced natural gas and emissions-free nuclear and solar. Today we're taking steps to substantially increase our investment in cost-effective solar while eliminating our use of coal from Florida.

Our latest fuel mix compared to the rest of the nation:

FUEL	FPL ¹	U.S. ²
Natural Gas	69.2%	39.8%
Nuclear	20.0%	18.2%
Solar	5.4%	3.4%
Purchased Power	4.7%	N/A
Coal ³	0.7%	19.5%
Oil	0.1%	0.6%
Wind	N/A	10.2%
Hydroelectric	N/A	6.2%
Other renewables	N/A	1.7%
Other (not classified)	N/A	0.4%

¹ Sources of electricity generation for the 12 months between May 2022 and April 2023.

² Major energy sources and percent share of total U.S. electricity generation in 2022

³ Coal generation is from units outside the state of Florida.
