

FPL has a storm plan, do you?

We prepare year-round by making ongoing investments for a more storm-resilient energy grid. Our storm plan involves a systematic approach to build the grid of the future, including:

- » Strengthening main power lines, including those that serve critical community facilities.
- » Deploying self-healing smart grid technology.
- » Proactively relocating more neighborhood power lines underground.

While no grid can be stormproof, these investments help limit outage times associated with severe weather events and reduce restoration costs, while also improving overall reliability for customers. Just as we're prepared for storm season, we encourage you to make sure your business is prepared too.

» Visit [FPL.com/Storm](https://www.fpl.com/storm) for resources to help you develop your storm plan.

Help stop power surge damage at the meter.

Help protect your business operations and equipment from costly power surge damage with the Commercial SurgeShield® program.

**No long-term commitment,
no installation fees, and at
just \$34.95 per month.**

COMMERCIAL SurgeShield®

Call **1-800-590-1235**, or visit
[fples.com/commercial-surgeshield](https://www.fples.com/commercial-surgeshield)
to sign up.

- » A commercial-grade surge protector professionally installed at the electric meter.
- » Includes a \$5,000 limited manufacturer's warranty per covered appliance, per occurrence, for damages caused by failure of the surge protector to properly perform.

Stay safe, stay clear of power lines when picking fruit

Do NOT trim or pick fruit around power lines. Hire pros for trimming or picking fruit near power lines and always maintain at least 10 ft. distance from a power line to you or the tip of any tool you are using. Touching a power line directly or with a tool can seriously hurt you OR be fatal.

» Visit [FPL.com/Trees](https://www.fpl.com/trees) for more safety tips.

Be on the lookout for scams

Scammers use tactics to establish relationships with businesses and suppliers to receive goods or services. Don't be a victim. Send us an email at reportbusinessfraud@nee.com to confirm the legitimacy of the request.

Where does your energy come from?

FPL delivers you energy from a variety of sources, including clean, U.S.-produced natural gas and emissions-free nuclear and solar. We continue to make cost-effective investments in solar energy while eliminating our use of coal from Florida.

Our latest fuel mix compared to the rest of the nation:

| FUEL | FPL ¹ | U.S. ² |
|-----------------|-------------------|-------------------|
| Natural Gas | 70.9% | 43.1% |
| Nuclear | 19.6% | 18.6% |
| Solar | 6.6% | 3.9% |
| Purchased Power | 2.4% | N/A |
| Coal | 0.4% ³ | 16.2% |
| Oil | 0.2% | 0.4% |
| Other | N/A | 17.8% |

¹ Sources of electricity generation for the 12 months between April 2023 and March 2024; figures do not add up to 100 because of rounding. ² Major energy sources and percent share of total U.S. electricity generation as of February 2024 from U.S. Energy Information Administration ³Coal generation is from units outside Florida
